Weight Tracking Analyser

Weight Tracking Analyser is a special purpose software package developed for weigh-bridges that measure weight of goods loaded onto a truck.

It is complete weigh-bridge management software system that can be configured as per your needs. It is able to take input directly from the weighing machine automatically, keep track of identity of trucks weighed, their gross weight, tare weight and calculate net weight of goods loaded. The trucks can be **checked in**, **checked out** and the software has full security.

Needless to say that, it helps you print the weight slips and generate a variety of reports needed to manage the weigh-bridge efficiently.

Various Reports :

- Weigh Slip
- Good Received Note
- OCR Outward Challan Returnable Receipt
- OCN Outward Challan Non Returnable Receipt
- Freight Certificate
- Grant Outward Report
- Grant Inward Report
- Truck Details (Date Wise / Tonnage Wise / Area Wise etc..)
- Transporter Details
- Truck Tonnage Variability Report (Trucks Suspicious for Theft of Goods)

Some of the companies where the customised software has been designed is mentioned bellow.

1. ISRO - Shar Center
2. BARC - Heavy Water Plant. (Baroda)
3. USHA Ispat Ltd. (Pig Iron Plant)
4. Super Salt
